6DOF ROBOT ARM
TRAJECTORY PLANNING REPORT

Experiment Type: Circular Path
Date: 2026-06-13

INPUT PARAMETERS

Start	None
End	None
a2	150.0
a3	130.0

TRAJECTORY

Points: 0

[]

JOINT ANGLES ($\theta_1 \rightarrow \theta_6$)

[]

JACOBIAN ANALYSIS

Samples: 0

SUMMARY

This report demonstrates trajectory planning for a 6DOF robotic arm. It includes inverse kinematics, forward kinematics, and Jacobian analysis for motion validation and singularity detection.
